

## Product Description

591FSK is a liner free multi-layer foil laminate system designed to seal and protect duct seams where FSK is used as the primary insulation facing.

## Performance Features

UL Class 1 rated – meets or exceeds all UL 723 requirements  
All Weather Formula adhesive maximizes insulation system integrity.  
Self Wound construction increases efficiency on the job site: creating easy application with no liner to peel off.  
The liner free construction results in less waste and therefore less time spent on cleaning up the site.  
Lighter weight rolls provide easier handling and application.

## Applications

591 is unique – the specially formulated rubber adhesive system does not require a paper liner. The product is designed to be applied directly from the roll. The liner free construction provides significant gains in application efficiency and safety to the contactor, while also reducing waste and clean up time on the job site.

## Technical information

Backing type	Aluminium FSK
Adhesive	Rubber
Backing Thickness (mm)	0.18
Adhesion to Steel (N/25mm)	23.6
Tensile Strength (N/25mm)	168.9
Temperature Range (°C)	Between -23 and +82

Important: The performance of all adhesive products is affected by many factors: heat, humidity, type of substrate, texture, inks used, and application technique. Our suggestions and recommendations concerning the use and application of our products are based on tests we believe are reliable. However, the purchaser must test the suitability of our products for his intended use under his own operating conditions. American BilRite Inc. Assumes no liability for claims beyond the replacement value of any defective products, and is no way for consequential or incidental damages. These products are not suitable for prolonged outdoor exposure.
