2051 is a double sided clear tape with trame polyester as carrier and a modified acrylic adhesive.

Performance Features

Excellent adhesion and good temperature and UV resistance.

Applications

Used for splicing and laminating in the sign industry for banner material.

Technical information

Carrier	Multi-directional polyester mesh
Liner	Silicone Paper
Colour Liner	Havana
Thickness without liner (mm)	0.12
Adhesion Strength (N/25mm)	30
Tensile Strength (N/25mm)	20
Temperature Range (°C)	Between -10 and +100

Important: The performance of all adhesive products is affected by many factors: heat, humidity, type of substrate, texture, inks used, and application technique. Our suggestions and recommendations concerning the use and application of our products are based on tests we believe are reliable. However, the purchaser must test the suitability of our products for his intended use under his own operating conditions. American BilRite Inc. Assumes no liability for claims beyond the replacement value of any defective products, and is no way for consequential or incidental damages. These products are not suitable for prolonged outdoor exposure.
