

# 9266

## Product Description

9266 is a strong tear resistant polyester film combined with a high temperature resistant, proprietary blended, rubber adhesive.

## Performance Features

The strong, conformable, polyester backing allows easy removal with no breaking or slivering.

The high temperature, non-silicone adhesive will strip clean leaving only minimum residue.

This tape is an excellent choice in applications where silicone contamination is unacceptable.

## Applications

This tape is designed to meet the demanding temperature and pressure conditions of autoclave and composite bonding applications.

It is also usable as a masking tape for powder coating applications

## Technical information

|                            |                         |
|----------------------------|-------------------------|
| Total Thickness (mm)       | 0.1                     |
| Backing Thickness (mm)     | 0.05                    |
| Adhesive                   | High temperature rubber |
| Adhesion to Steel (N/25mm) | 6.95                    |
| Tensile Strength (N/25mm)  | 222                     |
| Elongation at Break (%)    | 100                     |
| Colour                     | Green                   |

Important: The performance of all adhesive products is affected by many factors: heat, humidity, type of substrate, texture, inks used, and application technique. Our suggestions and recommendations concerning the use and application of our products are based on tests we believe are reliable. However, the purchaser must test the suitability of our products for his intended use under his own operating conditions. American BilRite Inc. Assumes no liability for claims beyond the replacement value of any defective products, and is no way for consequential or incidental damages. These products are not suitable for prolonged outdoor exposure.
