

**PT 323**

## Product Description

PT 323 Wheel Mask is a pressure sensitive, adhesive coated, clear, polypropylene film masking on a 68# release liner.

## Performance Features

*Removable:* Clean, stain free, one piece removal even after extend application.  
*Conformable:* Product remains intact even over bends and curved surfaces.  
*No edge lift:* Adheres evenly to the applied surface and resists edge lift even during transportation.

## Applications

PT 323 is designed to protect automotive wheels from brake dust and other environmental particles during transport to the dealer and storage. It can be die cut for easy application to wheels.

## Technical information

Total Thickness (mm)	0.0825
Tensile Strength (N/25mm)	72.27
Elongation (%)	600
Backing	Polypropylene
Adhesive type	Acrylic
Color	Clear
Adhesion (N/25mm)	8.9
Liner type	68# release liner
Shelf life (from time of manufacture)	24 months

Important: The performance of all adhesive products is affected by many factors: heat, humidity, type of substrate, texture, inks used, and application technique. Our suggestions and recommendations concerning the use and application of our products are based on tests we believe are reliable. However, the purchaser must test the suitability of our products for his intended use under his own operating conditions. American BilRite Inc. Assumes no liability for claims beyond the replacement value of any defective products, and is no way for consequential or incidental damages. These products are not suitable for prolonged outdoor exposure.
